

Event Perfekt Global Ltd

Quality Assurance Monitoring Policy

Effective Date: 15 April 2025

Review Date: 15 April 2026

1. Purpose and Scope

This policy outlines how Event Perfekt Global Ltd monitors, assures, and continuously improves the quality of its delivery across all contracts. It applies to strategic oversight, operational execution, cyber assurance, safeguarding, and stakeholder engagement.

2. Governance Structure

Quality assurance is embedded across all delivery functions and governed by a named core team:

- Tolulope Kumolu-Johnson – Managing Director, Project Director & Safeguarding Lead
- Emily Preston – Lead Event Manager
- AJ Adesanya – Cyber Security & Technical Lead
- Dash A White – Business Strategy Lead
- Grace Nwokoye – DPO Lead (within AJ's team)

All delivery is managed in-house or via embedded functions operating under direct governance.

3. Roles, Skills, and Governance Matrix

See Annex A: Roles, Skills, and Governance Matrix for a full breakdown of named leads, delivery areas, and governance responsibilities.

4. Monitoring Protocols

Quality is monitored through the following mechanisms:

- Weekly Delivery Reviews – Led by Tolulope Kumolu-Johnson, covering milestones, risks, and stakeholder feedback
- Live Risk Register – Maintained by AJ Adesanya and reviewed weekly

- Safeguarding Oversight – Led by Tolu, with escalation protocols and incident tracking
- Vendor Assurance – Managed by Emily Preston, including supplier compliance and performance checks
- Cyber Hygiene Audits – Led by AJ, covering access control, breach readiness, and platform resilience
- Stakeholder Feedback Loops – Managed by Dash, with post-delivery evaluation and ROI tracking

5. Escalation and Issue Resolution

Issues are escalated via a tiered structure:

- Tier 1 – Internal coordination and resolution
- Tier 2 – Supplier or venue liaison
- Tier 3 – Stakeholder or public messaging (via Dash, reviewed by Tolu)

All incidents are logged, reviewed, and closed with documented outcomes. Safeguarding and cyber incidents are escalated within 2 hours and reported in line with ICO and HSE protocols.

6. Continuous Improvement

Lessons learned are captured post-delivery and fed into future planning cycles. Dash A White lead on impact analysis and strategic refinement. All team members contribute to quarterly reviews and policy updates.

7. Review Cycle

This policy is reviewed quarterly and updated annually or sooner if required by operational changes, client feedback, or regulatory updates. All updates are logged and version-controlled via our digital PMO hub.
